

H2a: Topic-level salience divergence (clean attribution)

Mean per-bucket contribution to JSD; dots = individual (party, LP) cells · spec: full filter, native tau, code-305 mass removed

Drivers of divergence AFTER removing the code-305 procedural artefact. The artefact's magnitude (incl-vs-excl) and its code-level source are shown in 17 (PART 3) and 13.
